Maintenance:	Use warm water and mild soap. Blot dry with a clean, soft towel.

Metalescence achieves the look and character of lustrous metal through the process of metal leafing. Metallic leafing is applied to an array of textured base materials and highlighted with water-based inks, creating an extraordinary finish. Most Metalescence wallcoverings are created with renewable, recycled or recyclable resources, which are breathable and PVC free.

For Installation and Cleaning Instructions, please contact our Customer Service/Production Department at (800) 227-8053.
