Care and Maintenance

General maintenance can be achieved with periodic dusting and/or vacuuming of materials using a soft bristle brush. Marks and stains can be cleaned using mild soap and warm water. Avoid all solvent based cleaners and use a blotting technique with a soft sponge. Abrasives and scrubbing can destroy your material face if used. Dry the cleaned area with a lint-free towel. Always test your cleaning method on a sample or inconspicuous part of the installation prior to cleaning the affected area to ensure no damage will occur.
