Care and Maintenance

General maintenance can be achieved with periodic dusting and/or vacuuming of materials using a soft bristle brush. Marks and stains can be cleaned using mild soap and warm water. Avoid all solvent based cleaners and use a blotting technique with a soft sponge. Abrasives and scrubbing can destroy your material face if used. Dry the cleaned area with a lint-free towel.

For stubborn stains, as a last resort a 10:1 water to bleach solution can be used, however it may impact the color fastness of the product during its lifetime.
