Innovations Launches FA19 Collection, Living In Geometry

Transforming simple shapes into art, this new collection of wallcoverings features precise yet approachable prints softened by visual movement and welcoming textures.

New York City (October 2019) — Inspired by the Bauhaus movement, the Living in Geometry collection uses clean lines and community-forward design to offer wallcoverings that enrich modern interiors. With an appreciation for the building blocks of artisanal trade - wood, denim, metal and utilitarian materials alike - the Innovations Design Studio applied inventive treatments to classic materials. Designed with textural detail and oscillating movement, these new products engineer color and shape to form prints that value style and function.

FORMA | FMA-10 VOLCAN

The FA19 collection includes 10 new wallcoverings, fresh recolored palettes for Innovations classics Origami and Nautilus, and a matte faux leather upholstery.

INNOVATIONS®

FELIX | FEL-001 TABB Y

From bold to balanced, these new products couple functionality with casual elegance. Living in Geometry offers products that add modern flare to time-honored textures suitable for walls, ceilings and other interior surfaces.
