

Innovations Launches SP20 Collection, Flora & Fauna

As fashion draws life from the animal kingdom, the journey continues to interiors.

SANCTUARY | SAC-003 TROPICAL RAINFOREST

New York City (February 2020) — Introducing Innovations' first wallcovering collection of the decade, Flora & Fauna. Pairing striking florals and tempting textures, this spotlight-stealing collection nods to Spring 2020 catwalks in New York, Paris and Milan.

Based in New York City, the Innovations Design Studio understands the longing for green oases and environments that inspire natural decompression. These remixed spring silhouettes include hand-drawn prints and lavish textures that nod to the ultimate inspiration, Mother Earth.

Twelve exotic wallcoverings explore lush tropics with lively textures, edgy florals and sophisticated animal prints.
